Communication

PROFILE

BIT graduate with hands-on experience developing an internal project management web application for a construction company. Experience working across frontend and backend technologies including HTML, CSS, JavaScript, Node.js, and Supabase, with basic exposure to SQL and Power BI. Looking for a junior or graduate IT role where I can continue learning and building real-world systems.

WORK EXPERIENCE

Independent Project
Umdoni Point Project Management | 2026

- Internal web-based system to manage and track construction.
- Progress tracking across different construction stages.
- Timelines to monitor project progress and deadlines.
- Functionality to store photos of houses and other files.
- User access control to restrict system access to authorized company users.

Technologies Used

HTML, CSS, JavaScript, Node.js, Supabase, GitHub.
