Problem solving

Willingness to learn

Analytical thinking

Time management

Collaboration

Communication

---

## PROFILE

BIT graduate with hands-on experience developing a real world internal project management web-app for a construction company, and a sports booking web-app. Experience working across frontend and backend technologies including HTML, CSS, JavaScript, Node.js, and Supabase, with basic exposure to SQL and Power BI. Looking for a junior or graduate IT role where I can continue learning and building real-world systems.

---

## WORK EXPERIENCE

### 2 Independent Projects

#### Umdoni Point Project Management | 2026

- Track projects, tasks, and progress with dashboards.
- Manage PC/PS amounts, variations, and expenses.
- Integrated chat and task assignment.
- Manage crew, weather, and project documents.
- User roles and data management.

#### Umdoni Point Sports Social Bookings | 2026

- Manage court bookings and check real-time availability.
- Create, schedule and oversee various sport sessions.
- Handle individual player and team profiles.
- Users can make bookings and join waitlists.
- Access performance stats and admin controls for the system

### Technologies Used

Vibe coded, React, Tailwind CSS, Backend-as-a-service data management, GitHub.
